

COMMUNITY OPERATED DAYCARE IN SCHOOLS

Consistent with the Division strategic aim to promote life-long learning and as a support to the quality of life in our communities, the Swan Valley School Division will cooperate and support community efforts to establish day cares within their communities by making school facilities available for day care subject to:

1. There being excess room in the school to accommodate a day care. The space to be provided must be considered surplus to K – 12 student needs in the school.
2. The day care is operated by an independent community board which is eligible for provincial licensing as a day care. The day care licensing will ensure appropriate building code compliance.
3. A suitable rental contract arrangement is negotiated which accommodates issues such as renovation needs, access, day care employee providing appropriate supervision and cleaning and care of the facility.
