

PARKING

Cars are to be parked in areas designated as parking areas. The principal shall allot parking space and plug-ins as available. The rental fee for the plug-ins is payable to Swan Valley School Division. Rates to be set annually

The Division grants Swan Valley Regional Secondary School Administration, the authority to have cars towed away if parked illegally around SVRSS.

Considerations for car plug rental assessment:

1. A request for a plug after October 31 may be subject to a late charge of \$25.00, plus the annual rental fee. The late charge does not apply to a new employee beginning employment after October 31 and requesting a car plug.
2. Car plug rentals will be charged at the full rate for employees employed over three hours a day. Car plug rentals will be charged at ½ rate for employees three hours or less. These are the only alternatives considered for rental charge.

In those situations where the parking lot meter is owned by staff, staff are responsible for monthly payment for power used as determined by the parking lot meter.
